Press Release

Swingframe Mfg. Announces A New Lightbox Brochure

Freeport, New York., May 25, 2007

Swingframe Manufacturing, a Division of Access Display Group Inc. Is offering a new lightbox and light panel brochure. The 8 page brochure features a wide-range of lightboxes to meet numerous display applications.

Swingframe presents several new lightbox designs:

New Thin Edgelit Light Panel Lightboxes with long-lasing T-4- linkable florescent bulbs. At only 2" overall all depth, these new technology etched acrylic panels allows the light to spread evenly throughtout the panels.

New Swingframe Backlit Lightboxes also utilizing T-4 Linkable bulbs come in standard depths of 4-6 inches.

Access Display Group, Inc. has four websites functioning including Swingframe.com, Access Display Group. Inc.'s manufacturing division website and three E-Commerce properties: Displays4Sale.com, SwingPanels.com and FloorStands.com. Several other websites are planned for 2010.

Both these illuminated displays are built with Swingframe's patented, swing-open, design system. The units come in standard and custom sizes and are available in metal and wood profiles. If additional security is needed, an optional side lock/key is available.

The two lighting systems, edgelit and backlit are also available with Swingframe's metal SwingSnap profile. This Poster Lightbox Snap Frame Lightbox has four frame rails snap-open frame for easy front-loading of the insert.

The Swingframe lightbox brochure can be viewed as a PDF file and can also be downloaded on it's website:
